

Appendix H

MBFC + SH Capstone Reflection Questions

Purpose

This appendix distills MBFC + SH into a small set of high-leverage questions intended to improve decision quality when situations are complex, uncertain, or high-impact.

Core Question

What problem are we actually trying to solve, and what outcome are we optimizing for?

Reflection Questions

Area	Reflection Question
Value	Does this move us toward More, Better, Faster, Cheaper, Safer, and Happier?
Friction	What Waste, Defects, Delays, Cost, Risk, or Frustration might this create?
System	What else changes if this is implemented?
Tradeoffs	What are we gaining, and what are we giving up?
Assumptions	What must be true for this to succeed?

Final Question

Does this create a clear net improvement across the system?

If the answer is unclear, additional learning may be required before deciding.

Closing Principle

The quality of organizational outcomes is largely determined by the quality of the questions asked before decisions are made.
